

# Site Access: Occidental Chemical

Great Lakes Safety Training Center assists various sites with their Contractor Site Access. Each site has a different set of contractor requirements, which may depend on job, time on the site, and access types.

For Occidental Chemical, each contractor is required to have Training and a Background Check to gain access and work on site. Below is the information which is required and broke down for each job type. As always, Occidental Chemical has the final say on all contractor access.

GLSTC request that all backgrounds be submitted at least 14 business days prior to needing site entry to process. The average turn-around time is 3-5 business days for a standard US Background Search. All backgrounds must be submitted either by fax (989.837.6330) or email ([background@glstc.org](mailto:background@glstc.org)) fully completed for proper processing.

Training must be registered for by the business day before the class. Class schedules are posted on our website and via our Learning Management System. You may also call or email ([enrollment@glstc.org](mailto:enrollment@glstc.org)) in order to register for classes. We suggest all background checks be completed before completing the training.
